## 1 issue description

---

Default Forms (Text, Form Types, Parameter, Layout Types) do not open in list format but in an empty form

This happens only on new installations of coresuite on SAP Business One 8.81 and higher.

## 2 search terms

---

UDO, designer, Default Forms, Text, Form Types, Parameter, Layout Types, matrix stye, header style, 8.82, 8.81

### 3 troubleshooting steps/tips

---

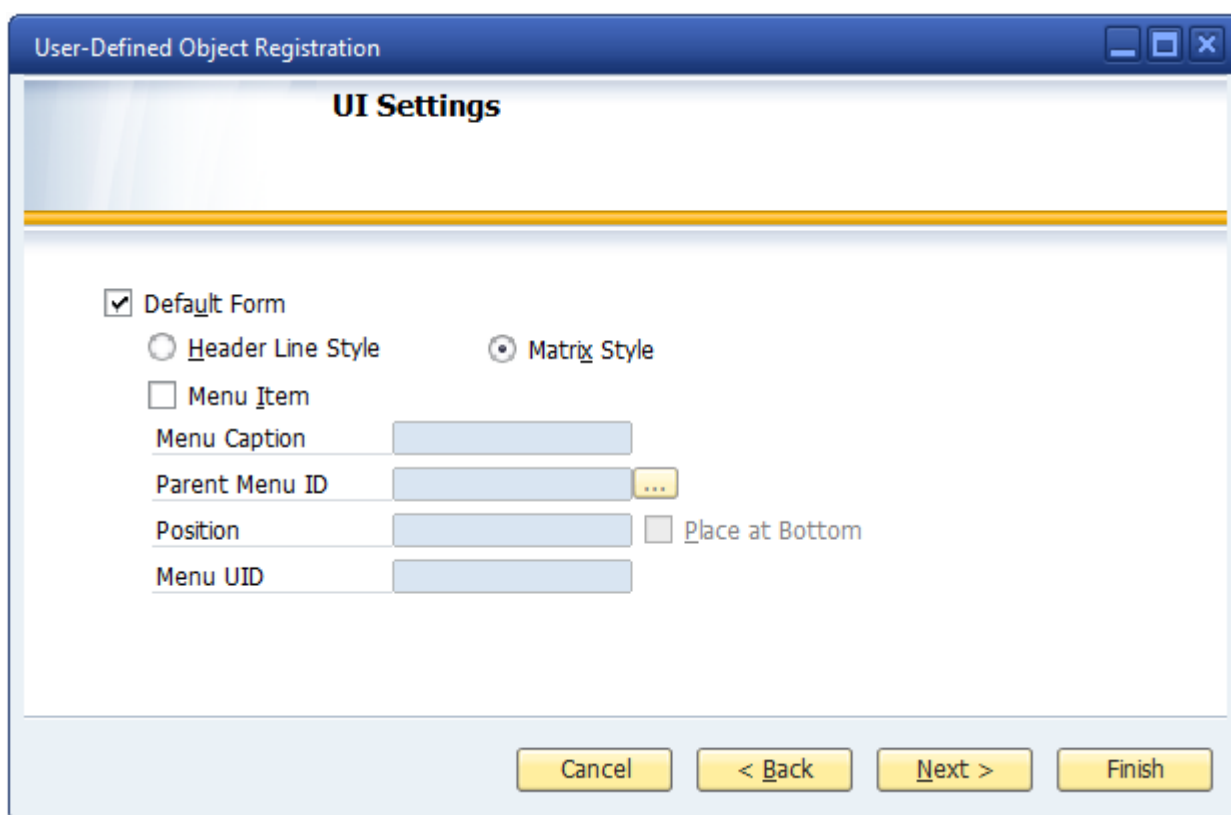

1. Open the layout Text List under  
> Administration > Add-Ons > coresuite designer > Text List - LD (GEN000001)
2. After the layout preview opens click on any linked error  
ACTUAL RESULT (if the system is affected by this error):  
Error occurs that the item could not be found  
EXPECTED RESULT:  
The list of texts appears and the focus jumps to the selected text code

## 4 solution

In a productive system make sure all users are disconnected.

For each registered object (Text, Form Types, Parameter, Layout Types) follow the steps described here:

1. Go to > Tools > Customization Tools > User defined Object Registration
2. In the wizard click Next
3. Select "Udate an existing object" and select the relevant object from the list (Text, Form Types, Parameter, Layout Types)
4. Click Next until you get to the window "UI Settings"
5. In the window "UI Settings" select "Matrix Style"

6. Click "Finish" and accept all windows following.

## 5 remarks
