

SAP Business One Notes

 **1630980 - Error happens when adding user-defined table by SQL query****Version 2**    **Validity:**  
27.09.2011 - active**Language** English

---

## Symptom

When you insert records into "No Object" type user-defined table by SQL query, error happens for the additional column "ArchiveDate".

## Cause

Application error

## Solution

This column will be removed.

SAP intends to provide a patch or patches in order to solve the problem described. The section **Reference to Related Notes** below will list the specific patches once they become available.

The corresponding **Info** file of the patches in SAP Service Marketplace will also show the SAP Note number.

Be aware that these references can only be set at patch release date.

SAP will deliver patches only for selected releases at its own discretion, based on the business impact and the complexity of the implementation.
