## 1 issue description

coresuite cannot be started due to the following error message:

Exception during loading of coresuite. Please contat your SAP sales partner.

Message: Specified argument was out of range of valid values.

# 2 troubleshooting steps/tips

Check if Debuglog contains a eference to "FontCache"

### 3 solution

If reference to FontCache, check if the Windows Presentation Foundation Font Cache 3.0.0.0 Service exists (Run: services.msc -> Check for Service)

- 1. in case this Service does not exist, reinstall .Net 3.5 SP1
- 2. in case this Service exists, complete the following steps:
  - 1. Stop Windows Presentation Foundation Font Cache 3.0.0.0 service
  - 2. Delete all the available "FontCache...dat" files, such as "FontCache-System.dat" or "FontCache3.0.0.0.dat" which can be found under: in XP: %systemdrive%\Documents and Settings\LocalService\Local Settings\Application Data in Vista: %windir%\ServiceProfiles\LocalService\AppData\Local
  - 3. restart the System BEFORE restarting SBO
